About this map

This map has been created to complement QUT's Authorship & Publication training. It provides a framework to help explain and discuss the complex world of academic publication.

Of course, this map is only a tool. In reality, the issues and connections are both more numerous and more tangled than what is represented here. Our hope, however, is that this document is a useful tool for researchers who want an overview of a very complex and important topic.

In the legend on the right-hand-side you will find hyperlinks to resources and tools.
